

Questions for Survey

Data Collection:

Interview/Survey:

Q:What is the medical equipment used in your job?

“Isn’t any necessarily any equipment used, only pillows and sara steadies to carry patients.”

Sara Steady

Q:Is there anything you use in your workplace to help treat or deal with pressure ulcers?

“There isn’t really any other equipment used, just medication to deal with or reduce severity for people with mild strokes, osteoporosis, etc.”

Q: Is there any equipment that your patients use specifically for pressure care?

“There’s a patient that has osteoporosis but they’re on a wheel chair. They also use elevating leg support when lying down.”

Q: Is there any equipment used for support when the patient is on a wheelchair?

“There’s a cushion used to reduce pressure on the spine for a wheelchair.”

Q: What was the brand?

“Not really any brand, just any inflatable cushion for the wheelchair that you could buy off of Amazon.”

Inflatable air cushion(used specifically for wheelchairs)

How are they cleaning up this product? Is there an need for this? Why?

“Ever since COVID, it’s been necessary to clean them with only antibacterial wipes or spray, since the material would just get ruined if we just used bleach.”
