About Me

Skills

- Software skills - Photoshop, InDesign, Illustrator, etc.
- Hardware skills
- Artistic skills

Hobbies

- Drawing
- Cooking

Hero Image, Phone Holder.

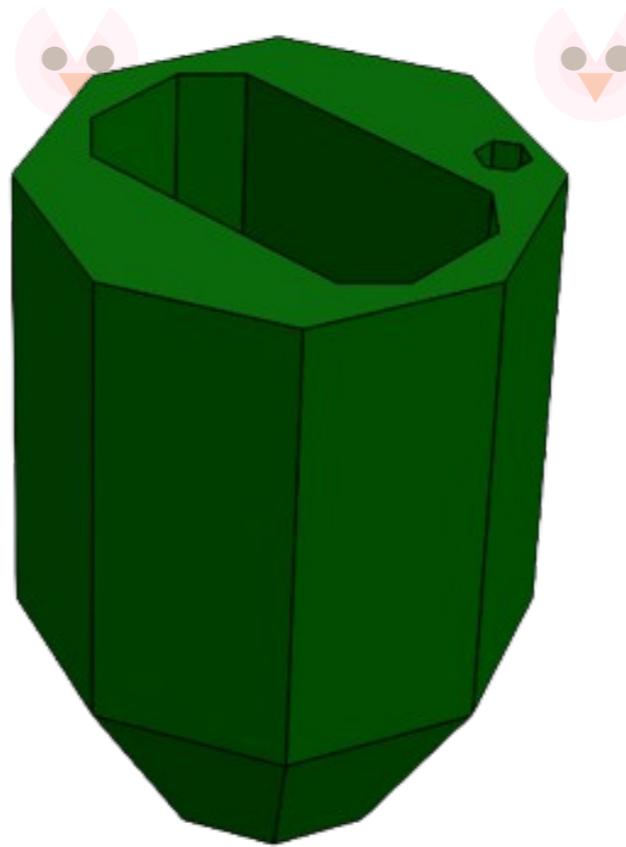

The project I chose
for my best work is
the phone holder from
last year.

Even though I dont consider
it the most aesthetically
pleasing, i consider it the work
I have with the most content
and detail to it.

Sketches.

Prototypes and finished products

- The finalised design turned out very different from the solidworks design.

- The project, or phone holder was insired from 'Studio Drop' by Jordan Ralph. It was used as an isolated residence for artists, modren and old.

Collaborative Work

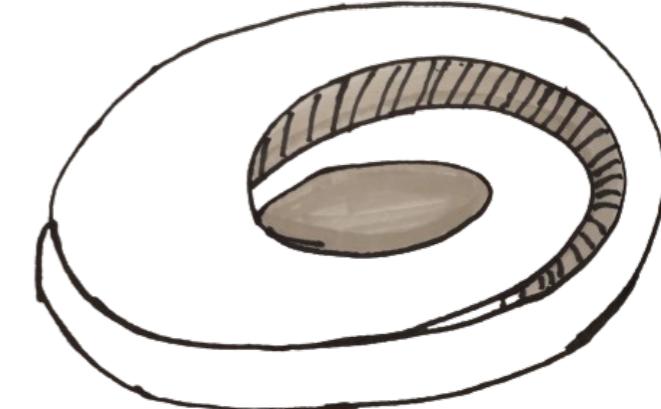

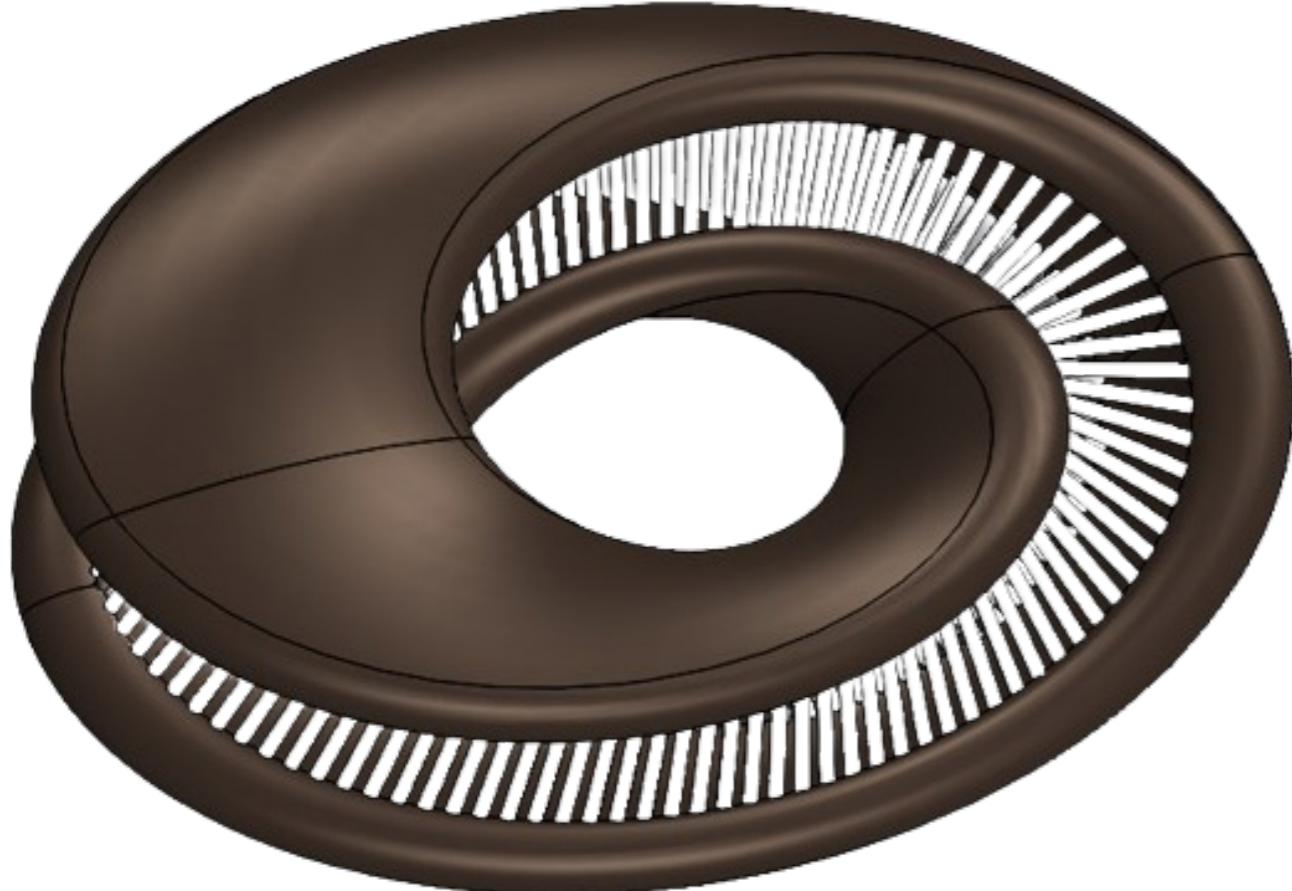

Brief: The purpose of this assignment was to design a portable shelter, using multiple manufacturing processes.

The design should be able to accomodate 6 people, using these said processes.

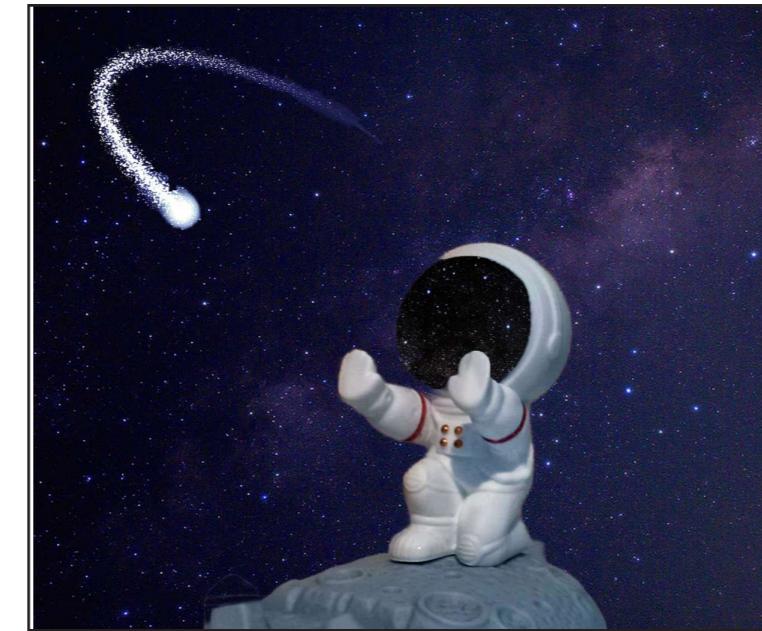

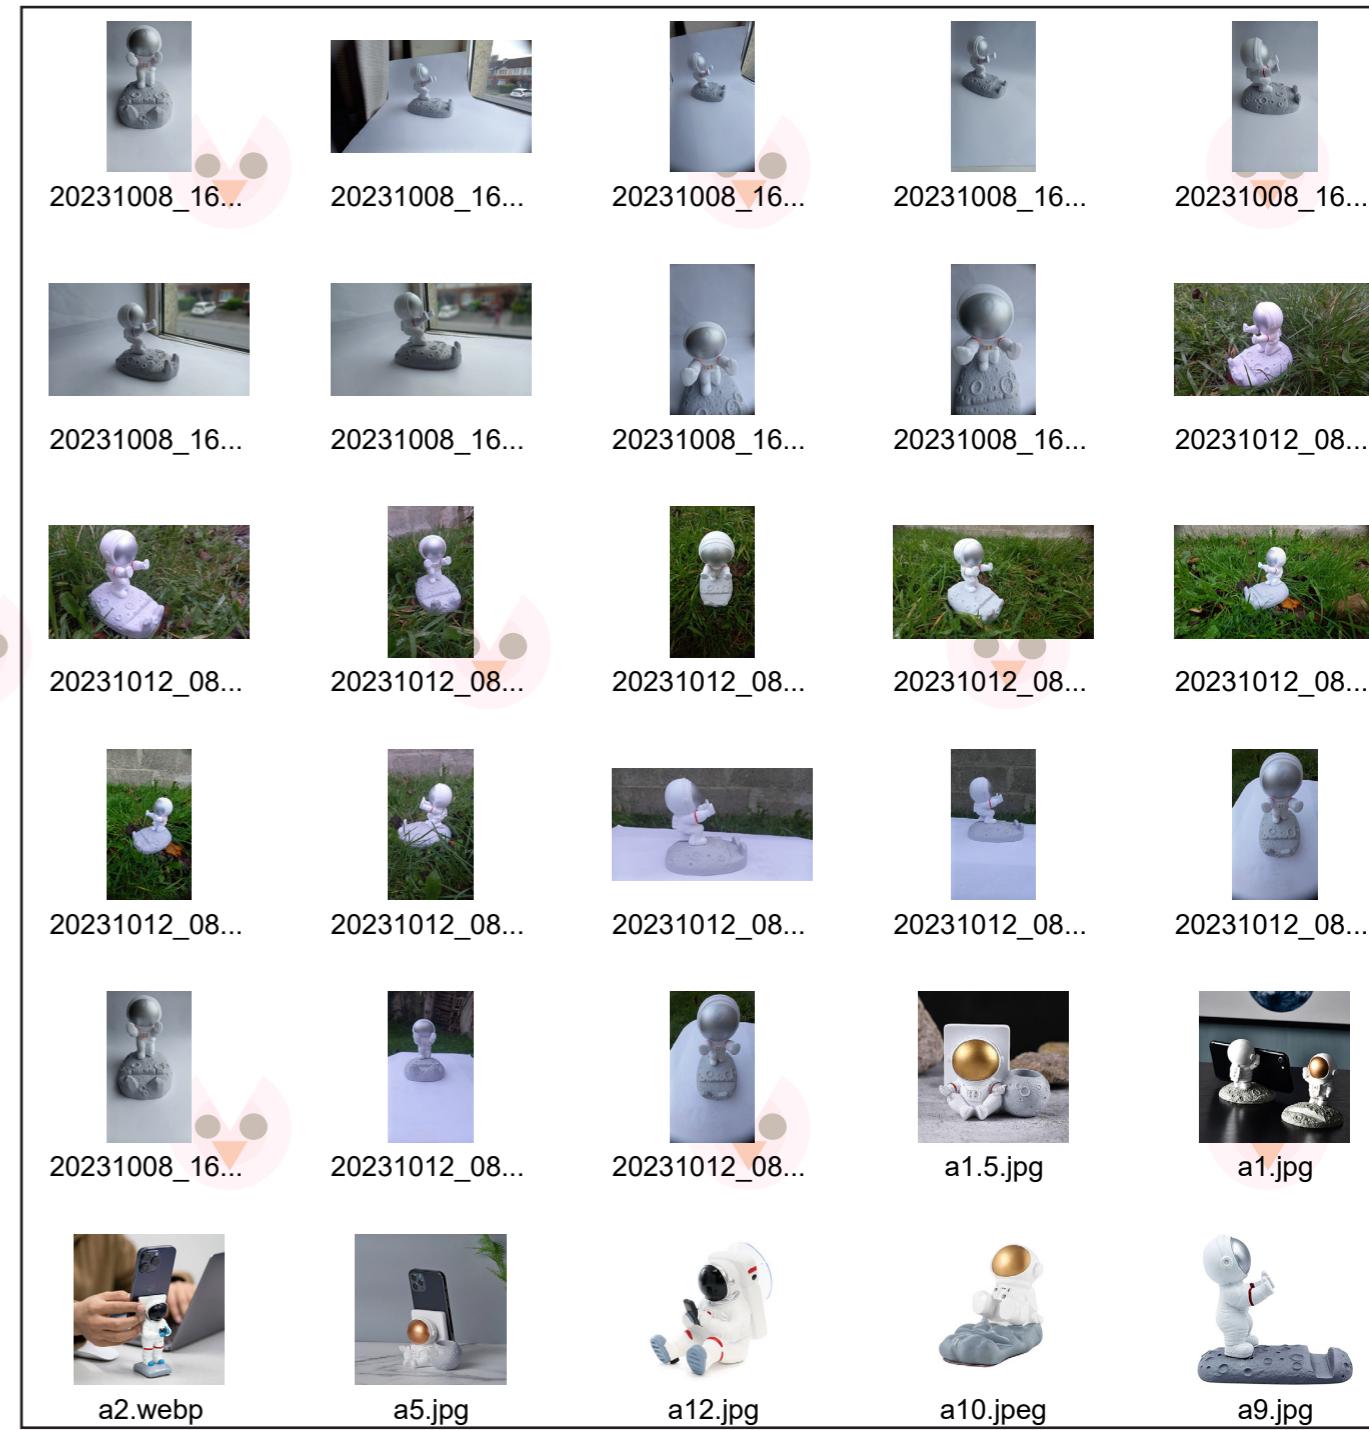

Project 3

This inspiration stems from other tutorials I did in my previous year as well as astronauts. Especially just wanted a spiral design with a hollow inside.

Inspired from a spiral design, specifically a möbius strip. Considered an infinite loop when connecting two parts of paper together with a half-twist.

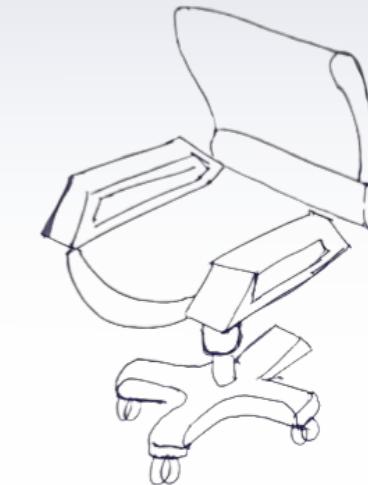

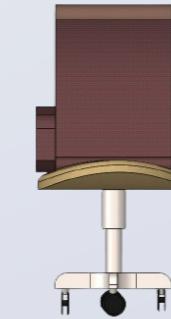

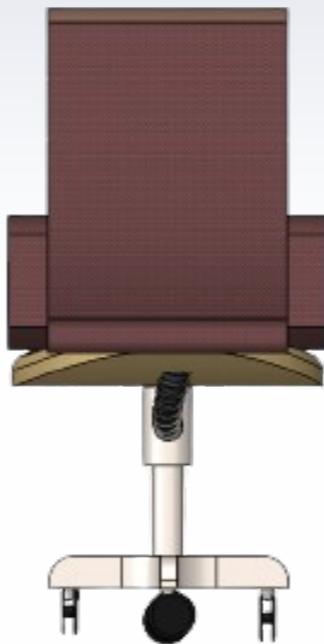

Astrounauts: Project 3 Inspiration

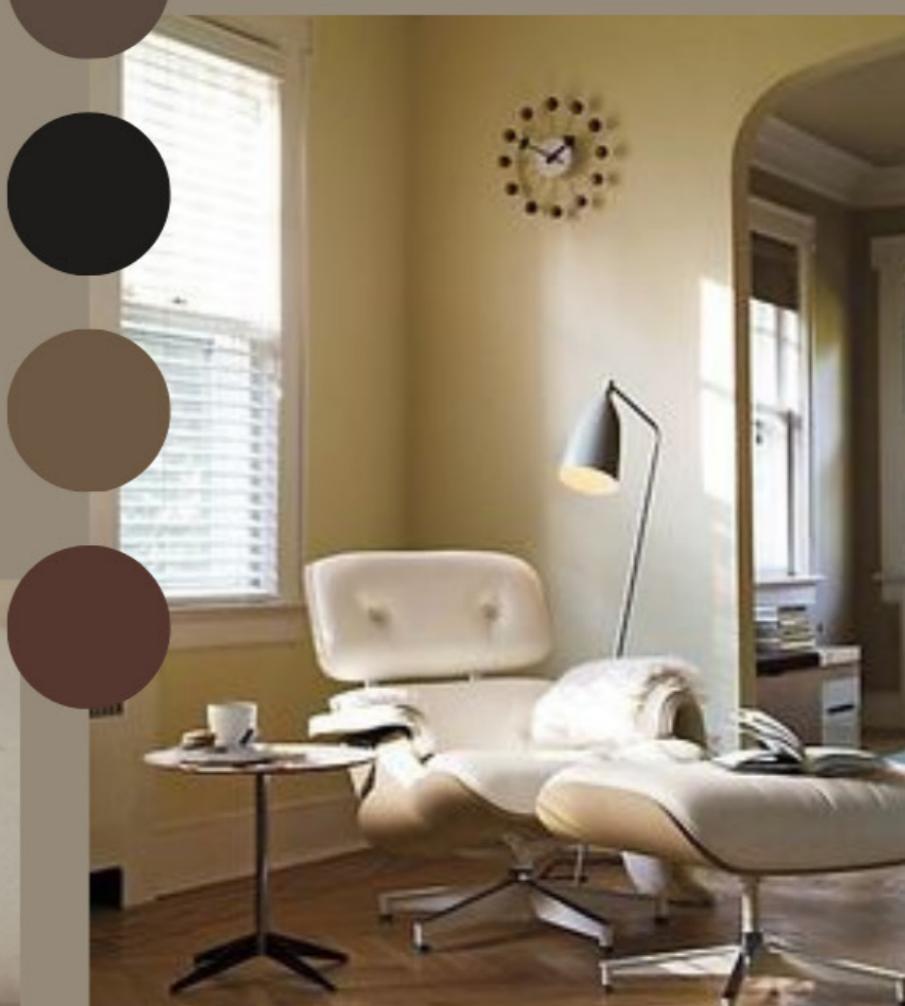

Project 4

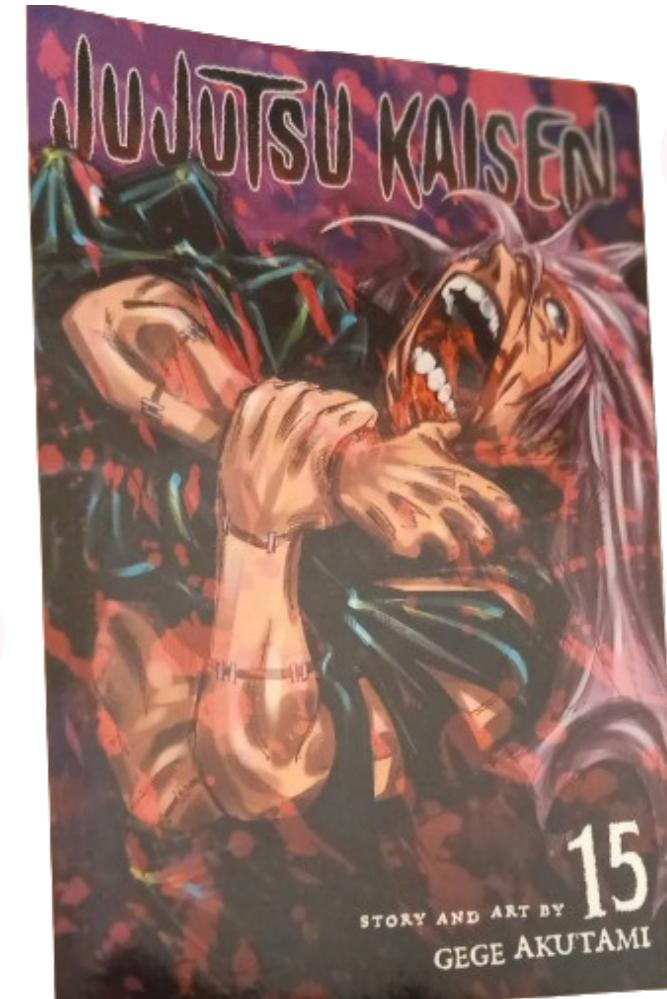

2nd Best Work

Simple chair design inspired by moodboard.

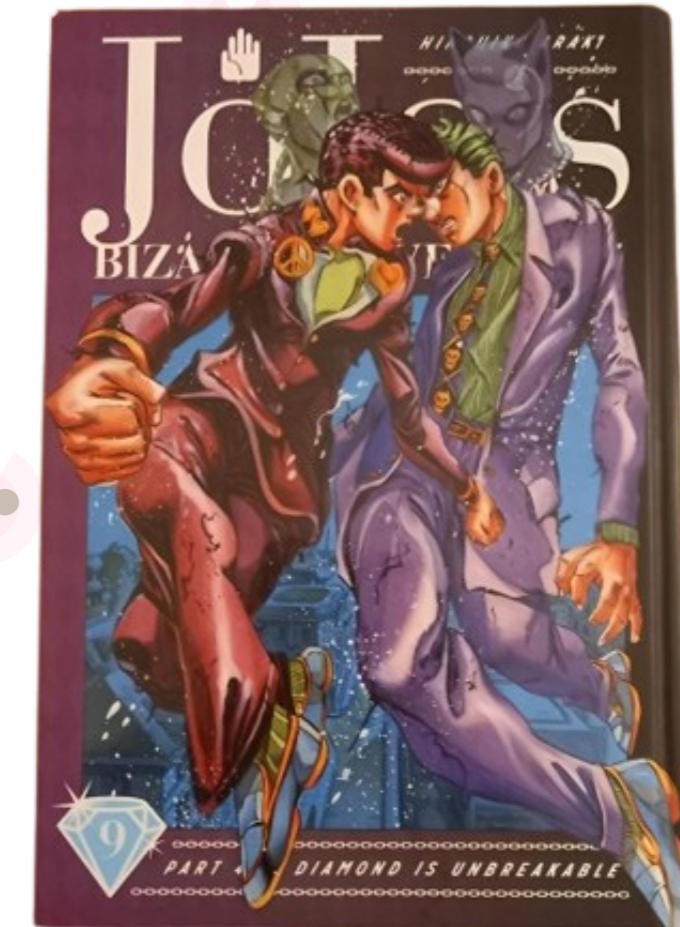

I consider this as my second best work due to the appealing design.

Collecting,

- Collect some traditional items and comics for past time.
- The picture of the man in the hat is a palm oil farmer.
- Images on the left are of a fan , fine china, and a tribal hat, used for weddings, special events, etc.
